WEEBER & DON'S ::

NOVELTIES AND SPECIALTIES IN ......

Vegetable Seeds.

Stringless Green Pod Bean.

The only stringless green podded Bean on the market; it is earlier than the long yellow Six weeks, while the pod is round and full, longer and straighter than the Red Valentine and therefore is superior to either of these varieties in appearance as well as in quality. Price, per pt., 20 cts.; qt., 40 cts.; peck, $3.00.

Earliest Valentine Wax Bean.

This is an improved extra early Valentine Bean, with round wax pods. It is without exception the earliest wax bean in use, being even earlier than the Refugee Wax. The pods are very meaty, and with so very little string that they may justly be called stringless. It is remarkably free from rust, and remains a long time without becoming tough. Per pt., 15 cts.; qt., 30 cts.; peck, $2.00.

Crosby's Egyptian Beet.

A selection from Early Egyptian, which retains the earliness of the parent stock, and has added thickness, giving it a more desirable shape; it is the deepest red, almost black in color, and is of finer quality than the Egyptian, being sweeter and even more tender and smoother. It is a very rapid grower and can be sown outside as late as July. Per pkt., 5 cts.; oz., 10 cts.; 1/4 lb., 25 cts.; lb., 75 cts.

Detroit Dark Red Turnip Beet.

A grand Beet; tops exceptionally small and uniformly upright; roots are perfect turnip shape with small tap roots. This will be found one of the deepest red Beets. Quality of the best, sweet and tender. Per pkt., 5 cts.; oz., 10 cts.; 1/4 lb., 25 cts.; lb., 75 cts.

New York Market Carrot.

Bright orange color. It has a small core, is crisp, tender and sweet. It is one of the heaviest cropping varieties. Handsome, large size, resembling the Danvers in shape. Per pkt., 5 cts.; oz., 10 cts.; 1/4 lb., 30 cts.; lb., $1.00.
Charleston Wakefield Cabbage.

This Cabbage is of the same type as the "Jersey" Wakefield, but is a decided advantage over that variety. It grows about 50 per cent. larger and is of the same fine quality, and ready to cut from 3 to 5 days later. We can now offer this pronounced type, and can recommend it to all who want a larger size cabbage. Per pkt., 5 cts.; oz., 30 cts.; ¼ lb., $1.00; lb., $3.00.

Wheeler's Imperial Cabbage.

This variety of Cabbage is very popular in England, and is fast gaining favor on this continent. In type, it somewhat resembles the Sugar-loaf, but is much smaller. The heads are of fine quality, very sweet and tender, with few outer leaves. One of the earliest. Per pkt., 10 cts.; oz., 40 cts.; ¼ lb., $1.40; lb., $5.00.

All-Head Early Cabbage.

This sort produces large, round, flattened heads which are of uniform size, very hard and of fine texture, and weigh from 10 to 15 pounds. It is a good keeper and shipper, of fine quality and certain to head, even in the most unfavorable seasons. Per pkt., 5 cts.; oz., 30 cts.; ¼ lb., $1.00; lb., $3.00.

Early Spring Cabbage.

An extra early Cabbage, with a round flat head, coming in with the Early Jersey Wakefield and yielding one-third more on the same space of ground than any other extra early. Per pkt., 10 cts.; oz., 50 cts.; ¼ lb., $1.75; lb., $6.00.

Little Pixie Cabbage.

One of the best First Early Cabbages. Somewhat after the style of Jersey Wakefield, but just about half the size, a decided improvement over that variety, very dwarf, solid, and few outer leaves, very little waste, fine flavor and tender. Per pkt., 10 cts.; oz., 40 cts.; ¼ lb., $1.40; lb., $5.00.

Perfection Drumhead Savoy Cabbage.

This selection is certainly the finest we have seen, and largely grown on Long Island for the New York market. Per pkt., 5 cts.; oz., 30 cts.; ¼ lb., $1.00; lb., $3.00.

First and Best Cauliflower.

The surest header and best for forcing.

This splendid Cauliflower is without doubt the finest variety for forcing or general use that has yet been introduced. The plant is of a dwarf and compact habit, with short stem and small leaves. In earliness it is a week ahead of the Snowball, and its firm snow-white heads are larger than any other variety. Per pkt., 60 cts., ¼ oz., $2.50; oz., $8.00.
Improved Golden Self-Blanching Celery

A self-blanching variety of the "White Plume" order, but far superior for either market gardeners' or private use. It requires earthing up, although but little more than the "White Plume." It is very crisp, tender, and of fine flavor, keeps well throughout the season, and is the earliest variety grown. Per pkt., 10 cts.; oz., 40 cts.; 1/4 lb., $1.25; lb., $4.00.

Golden Rose Celery.

This recent introduction is deserving of much praise, and is worthy of a trial in every garden. It resembles the well-known Golden Self-Blanching in flavor; dwarf growth; the stalks are very brittle, and is self-blanching. The attractive color combined with its earliness and exceedingly fine quality makes it the most desirable celery for table use. Per pkt., 10 cts.; oz., 60 cts.; 1/4 lb., $2.00; lb., $7.00.

The Schumacher Celery.

Immense, large-growing sort, perfectly solid, crisp, and of a fine nutty flavor. It has a firm, golden-yellow heart; splendid keeper; one of the finest for market purposes. Per pkt., 10 cts.; oz., 40 cts.; 1/4 lb., $1.25; lb., $4.00.

Early Mammoth Sweet Corn.

A valuable variety, at least ten days earlier than the Mammoth. Ears twelve-rowed, straight and handsome. It is remarkable for its delicious sweetness. Per pt., 10 cts.; qt., 20 cts.; peck, $1.25.

Country Gentleman Sweet Corn.

The sweetest and most tender of all sweet corn. The ears are short, the cob is small, and the kernels pearly white and irregularly crowded together on the cob. Per pt., 15 cts.; qt., 25 cts.; peck, $1.50.

Large Late Mammoth Sweet Corn.

The largest late variety grown; very productive and fine flavored. Per pt., 10 cts.; qt., 20 cts.; peck, $1.25.
The Don Sweet Corn.

As early as the Cory, with ears measuring from 8 to 10 inches long.

The grains are pure white, sweet and tender, and have from 10 to 12 rows on each cob. Our market gardeners say that for large size, earliness and productiveness it has no equal. Per pint, 15 cts.; qt., 30 cts.; peck, $2.00.

Early Champion Sweet Corn.

This variety is, without doubt, the earliest large Sweet Corn, producing ears nearly as large as those of the Mammoth; white cob, very sweet and full of milk, yielding from two to three ears on each stalk. One of the best for market garden purposes. Per pint, 15 cts.; qt., 25 cts.; peck, $1.50.

Bennett's Improved White Spine Cucumber.

This strain grows from seven to ten inches long, proportionately thick throughout, being as full at both ends as in the centre. It is a week earlier than the variety known as "Improved White Spine," but retains its glossy dark green color much longer on the vine. Per pkt., 5 cts.; oz., 10 cts.; 1/4 lb., 30 cts.; lb., $1.00.

Cool and Crisp Cucumber.

This variety is the earliest and most prolific of all pickling Cucumbers, and is certain to become a standard sort. It is also most useful for slicing, the Cucumbers, when fully matured, being of good size and exceedingly tender and crisp. Per pkt. 10 cts.; oz., 25 cts.; 1/4 lb., 60 cts.; lb., $2.00.

New English Forcing Cucumbers.

COVENT GARDEN FAVORITE. Per pkt., 25 cts.
ROCKFORD'S MARKET. Per pkt., 25 cts.
LOCKIES' PERFECTION. Per pkt., 25 cts.

Florence, or Naples Fennel.

Sow in spring, in rows 16 to 20 inches apart. Thin out so as to have the seedlings 5 or 6 inches apart, and water as plentifully as possible. The plant is usually eaten boiled. In flavor it resembles Celery, but with a sweet taste and a more delicate order. Per pkt., 5 cts.; oz., 15 cts.; 1/4 lb., 30 cts.; lb., $1.75.

Water Cress.

TRUE ERFURT.

This wholesome salad may be grown in any moist situation, but more successfully by the edge of a running brook, and is more highly esteemed than the ordinary variety, being less pungent and of a more agreeable flavor. Per pkt., 15 cts.; oz., 75 cts.; 1/4 lb., $2.50.
“Golden Queen” Forcing Lettuce.

A very desirable, small, early variety, of a most pleasing golden-yellow color. It forms all solid heads, with little or no waste, so that there is really more to it than in many Lettuce double the size. It is very crisp, tender, juicy and delicate flavor. Per pkt., 5 cts.; oz., 10 cts.; $1.25.

Mammoth Black Seeded Butter Lettuce.

A large head Lettuce of splendid quality; much lighter in color than the Big Boston. For early or late crop it has no equal; splendid market sort. Per pkt., 10 cts.; oz., 20 cts.; $1.00.

Paul Rose Musk Melon.

This new salmon-fleshed Musk Melon surpasses anything yet introduced. The color is of a beautiful netted gray underlaid by dark green rind; the flavor is delicious; a splendid shipper and good keeper. Per pkt., 10 cts.; oz., 25 cts.; $2.50.

Tip Top Musk Melon.

The Tip Top Melon is so distinct in appearance that it attracts favorable attention at first sight. It is sweet, juicy, fine flavor, firm, but not hard-fleshed, eatable to the very outside coating. In productiveness it is unexcelled, being a very strong grower. One of the best for market purposes. Per pkt., 5 cts.; oz., 10 cts.; lb., $1.00.

Long Island Beauty Musk Melon.

This variety is of the Hackensack type, but possesses many advantages over that popular variety. The flesh is green and of the very finest quality, and the skin is densely netted. In shape it resembles the Hackensack, but is slightly more ribbed. Decidedly an attractive looking melon. It is also the earliest of all the standard varieties. Per pkt., 5 cts.; oz., 10 cts.; 1/4 lb., 25 cts.; lb., 75 cts.

Rocky Ford Musk Melon.

This has become one of the most popular of small or basket melons. The fruit is oval, slightly ribbed, densely covered with coarse netting. Flesh thick green, very sweet and high flavored. We offer an exceptionally fine stock of this sort, the fruit being wonderfully uniform in shape and quality. Price, per pkt., 5 cts.; oz., 10 cts.; 1/4 lb., 30 cts.; lb., $1.00.

White Bunch Onion.

A handsome white variety of vigorous habit, producing large, showy Onions of fine quality. This is not a good keeping variety, but for bunching for sale or using in the green state it cannot be surpassed. Per pkt., 5 cts.; oz., 20 cts.; 1/4 lb., 60 cts.; lb., $2.00.

Musk Melons for Forcing.

American Hollow Crown Parsnip.

The superior qualities of our improved strain of Parsnip are now so well established that it would be superfluous for us to further extol its merits. The roots are the largest that are brought to the New York market—long, smooth and milky-white. It is, without doubt, the finest stock of Parsnip in this country. Per pkt., 5 cts.; oz., 10 cts.; 1/4 lb., 20 cts.; lb., 50 cts.
New York Market Pea.

This is the finest round white Extra Early Pea that has yet been introduced. The pods are of a dark green color and are produced in immense quantities. For earliness it is a week ahead of all that class of peas. 2½ ft. Per pt., 15 cts.; qt., 25 cts.; peck, $1.25.

Gradus Pea.

This is undoubtedly the most up-to-date Early Pea, notwithstanding the pea "ripened with our New York Market." The pods of "Gradus" are of about the same size as the well-known "Telephone," with very large wrinkled peas of a beautiful dark green color; the variety being only 2½ feet in height. Fine in quality and of excellent flavor, "Gradus" is the most distinct Early Pea yet introduced, and for show purposes it stands unrivalled. Per pt., 20 cts.; qt., 40 cts.; peck, $2.50.

Nott's Excelsior Pea.

We consider this Dwarf Extra Early variety one of the best of recent introduction. Vines are larger and more vigorous than the "American Wonder," earlier and more prolific than the "Premium Gem." Pods well filled with peas, which in sweetness and quality are far superior to any of the other extra early varieties. Height, 1½ ft. Per pt., 15 cts.; qt., 30 cts.; peck, $1.50.

Exonion Pea.

A tall growing, wrinkled pea, as early as American Wonder. Vines about three feet high. Slightly curved pods, containing four to eight green, medium sized peas, exceedingly sweet and tender. Per pt., 15 cts.; qt., 30 cts.; peck, $2.00.

Prosperity Pea.

The pods which are as large as Telephone, are produced in great abundance, and are well filled with from six to eight peas of enormous size, but its chief value lies in its earliness. Per pt., 20 cts.; qt., 40 cts.; peck, $3.50.

The Don Pea.

This is a deep green, wrinkled sort; produces an abundant crop of large, square-ended, well-filled pods. These are literally crowded with fine, large peas of a delicious flavor. It grows about four feet high, and comes into bearing between the second early and main crop. Per pt., 15 cts.; qt., 30 cts.; peck, $2.00.

This is the largest-podded pea yet introduced, the strong vines bearing one mass of large, well-filled pods of a deep green color, delicious flavor. A few days earlier than the "Advance," 3½ feet. Per pt., 15 cts.; qt., 30 cts.; peck, $3.00.
Earliest Carmine Forcing Radish.

The earliest variety in cultivation, deep scarlet, turnip shaped, very small top, flesh crisp and white. The most valuable for forcing or general sowing. Per pkt., 5 cts.; oz., 10 cts.; ¼ lb., 25 cts.; lb., 75 cts.

Non Plus Ultra, Forcing Radish.

Early Scarlet Turnip, White Tipped Forcing Radish.

Improved White Bush Squash.

We have been supplying this Improved strain of White Bush Squash for several years to our Market Garden trade on Long Island. It is a decided improvement on the old variety, being very much thicker in the centre, and with a little or no rim; a splendid market sort. Per pkt., 5 cts.; oz., 15 cts.; ¼ lb., 40 cts.; lb., $1.25.

Half Long Black Autumn Radish.

A very desirable radish for late summer and fall use. The flesh is white, crisp and tender; of quick growth, and stands the heat well. Per pkt., 5 cts.; oz., 15 cts.; ¼ lb., 40 cts.; lb., 50 cts.

Giant Summer Crookneck Squash.

This Squash is twice as large as the ordinary Summer Crookneck, far more warty, and several days earlier. Desirable squash for the private garden. Per pkt., 5 cts.; oz., 10 cts.; ¼ lb., 25 cts.; lb., 85 cts.

Golden Yellow Olive-Shaped Radish.

This is a fine German Radish, equally well adapted as an early forcing or summer radish. It is of very rapid growth and fine quality; flesh white, tender, crisp and brittle. The outside skin is a bright yellow, and has a very small top. Per pkt., 5 cts.; oz., 10 cts.; ¼ lb., 25 cts.; lb., 75 cts.

Cocozella Squash.

This Italian Squash grows about twenty-two inches long, with a diameter of about four inches. The skin is smooth, of a dark green color, marbled yellow or paler green, of very rapid growth, and fine flavored. In Italy it is quite a favorite, and is eaten when very young. Per pkt., 5 cts.; oz., 10 cts.; ¼ lb., 25 cts.; lb., 50 cts.

Victoria Spinach.

This variety is distinguished for its exceedingly dark, black-green color, and also for its very long-standing qualities, being from two to three weeks later than the ordinary "Long-Standing." The leaves are thick, and spread out flat upon the ground. It is excellent for sprig sowing, but not sufficiently hardy to stand the winter in this locality. Per pkt., 5 cts.; oz., 10 cts.; ¼ lb., 20 cts.; lb., 50 cts.

Frogmore Selected Tomato.
A splendid new variety for forcing. Fruit good size, deep bright red color, shape round and smooth, flesh solid, and exquisite flavor. Per pkt., 15 cts.

Improved Lorillard Forcing Tomato.
Possesses extra good forcing qualities, ripens very uniform over the whole surface; very solid, smooth, and well flavored, early, productive, handsome; a splendid variety for open air as well as for forcing. Per pkt., 10 cts.; oz., 50 cts.; ¼ lb., $1.00; ½ lb., $3.50.

Freedom Tomato.
This variety is as early as "Ruby," perfectly round, solid and with few seeds. Bright scarlet, borne in clusters and very prolific. Per pkt., 10 cts.; oz., 50 cts.; ¼ lb., $1.50; ½ lb., $3.00.

Dwarf Aristocrat Tomato.
This fine variety in habit of growth and foliage resembles the "Dwarf Champion" very much, and might be taken for that popular variety if it were not for the color of its beautiful, rich, glossy, red fruit, so much preferred in many localities to the purple or rose-colored varieties. The size, solidity, productiveness, smoothness, flavor of its fruit, etc., are up to the present day standard of excellence. It will be found especially desirable for forcing under glass and growing outside for early market purposes. Per pkt., 5 cts.; oz., 20 cts.; ¼ lb., 60 cts.; ½ lb., $2.00.

Matchless Tomato.
A distinct variety. It is early, of beautiful and uniform shape and good size; very dark red, and possesses extraordinary keeping qualities. Per pkt., 5 cts.; oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., $5.00.

Ponderosa Tomato.
This tomato is claimed to be the largest that has yet been introduced. It is of a bright red color, rather flat, but in flavor and solidity it is unequalled. A grand variety for canning purposes. Per pkt., 10 cts.; oz., 50 cts.; ¼ lb., $2.00; ½ lb., $8.00.

New Stone Tomato.
This is a large, very smooth, bright scarlet Tomato, ripening evenly to the stem, without cracking. The flesh is firm, solid and of excellent quality; one of the best for shipping. Per pkt., 5 cts.; oz., 20 cts.; ¼ lb., 60 cts.; ½ lb., $2.00.

CARROT.

German, Mohren.—French, Carotte.—Spanish, Zanahoria.

CAULIFLOWER.

German, Blumen-Kohl.—French, Chou Fleur.—Spanish, Coliflor.

**One ounce will produce 3,000 plants.**

A good, rich soil is essential for the successful cultivation of this delicious vegetable; our most experienced cultivators, however, acknowledge the advantage of a cool, moist season. Pursue the same general directions as recommended for growing Cabbage, watering liberally during dry weather. An occasional application of liquid manure is beneficial.

**FIRST AND BEST (New).** This splendid Cauliflower produces large, beautifully shaped head, and fine grained heads of snowy whiteness, while the flavor is extremely delicate. It is without question, the earliest, surest, and most solid heading variety grown in this country; fit to cut early in June a few days ahead of the "Snowball," differing from that variety in being more dwarf and robust. The leaves completely envelop the head, thus protecting it from the sun. Per pkt., 5 cts.; 1 oz., $2.50; oz., $6.00.

CAULIFLOWER PLANTS.—See page 33.
CELERY.

German, Selerie.—French, Celery.—Spanish, Apio.

One ounce will produce 5,000 plants.

The seed may be sown in the open border as soon as April as the ground can be worked. When the plants are three inches high, transplant four to a foot apart, in temporary beds of soft rich soil, where they will soon acquire sufficient strength for planting out in beds. Plant in four rows two feet apart, and set six inches apart in rows. If the weather is dry at the time of planting, care should be taken that the roots will be firm in the ground. After the planting is completed, nothing further is necessary for six to eight weeks, except running through between the rows with the cultivator or hoe and freeing the plants from weeds. About the middle of August earthing up is necessary for blanching and whitening of that which was wanted for early use. After the soil has been pressed close around each plant by the hand, firm enough to keep the leaves upright and proper, and prevent them from spreading, using care to prevent the soil falling into the heart of the plant.

GOLDEN SELF-BLANCHING. A self-blanching variety of the "White Plume" order, but far superior for either market gardens or private use. It requires earthing up a little more than the "White Plume." It is of a rich golden-yellow color, crisp, tender, and of fine flavor; keeps well through the summer season, and is the earliest variety grown. Per pkt., 30 cts.; oz., 40 cts.; ¼ lb., $1.25; lb., $10.00.

WHITE PLUME. A valuable early and exceedingly ornamental variety, requires very little labor in blanching, one of the best for early use. Per pkt., 5 cts.; oz., 25 cts.; ¼ lb., 75 cts.; lb., $2.50.

GOLDEN DWARF. A distinct variety: when blanched the heart develops a beautiful golden yellow; crisp, solid, fine flavor. Per pkt., 5 cts.; oz., 25 cts.; ¼ lb., 75 cts.; lb., $2.50.

PERFECTION HEARTWELL. It is of medium height, the stalks being long and thick, while its compact structure makes it easily worked. It blanches well up in the lenses, and the flavor, tenderness, distinct and delicious flavor are unequalled. Per pkt., 5 cts.; oz., 25 cts.; ¼ lb., 75 cts.; lb., $2.50.

GIANT WHITE SOLID. A favorite strong growing variety; hardy, solid and crisp. Per pkt., 5 cts.; oz., 25 cts.; ¼ lb., 75 cts.; lb., $2.50.

GIANT PASCAL. This splendid variety is a sport from the well-known "Golden self-blanching," carefully selected. It partakes of the fine nutty flavor of that variety without being stringy. The stalks are thick, solid and crisp, golden-yellow heart. Per pkt., 10 cts.; oz., 25 cts.; ¼ lb., 75 cts.; lb., $2.00.

SCHUMACHER. Immense, large growing sort, perfectly solid, crisp and of a fine nutty flavor. It has a firm, golden-yellow heart; splendid keeper; one of the finest for market purposes. Per pkt., 10 cts.; oz., 40 cts.; ¼ lb., $1.25; lb., $4.00.

FIN DE SIECLE. We consider this the largest, hardest, solidest, crispest, best keeping and best shipping winter Celery we know of. Per pkt., 10 cts.; oz., 35 cts.; ¼ lb., $1.00; lb., $3.50.

IMPROVED HALF DWARF. A superior white variety of intermediate size, possessing a delicious nutty flavor. One of the best for market or family use. Per pkt., 5 cts.; oz., 40 cts.; ¼ lb., 60 cts.; lb., $2.00.

WHITE WALNUT. A half-dwarf white variety, having uncommonly large and solid leaf stalks of fine walnut flavor. Per pkt., 5 cts.; oz., 25 cts.; ¼ lb., 75 cts.; lb., $2.50.

PINK PLUME. This Celery is a strong, healthy, compact grower, with no tendency to rust; stools very solid and crisp, extra early and a long keeper, remaining, when properly trenced, in perfect condition away into the spring. The variegation on the tops does not show quite as early as the "White Plume," but the celery branches and matures really a little earlier. It is a self-blanching variety in the same sense that "White Plume" and "Golden self-blanching" are; that is, it requires but a slight earthing-up or banking to prepare this variety for the table. Per pkt., 10 cts.; oz., 40 cts.; ¼ lb., $1.25; lb., $4.00.

CELERY—Continued.

GOLDEN ROSE. This recent introduction is deserving of much praise, and is worthy of a trial in every garden. It resembles the well-known Golden Self-Blanching in flavor; dwarf growth; the stalks are very brittle, and is self-blanching. The attractive color combined with its earliness and exceeding fine quality makes it the most desirable celery for table use. Per pkt., 10 cts.; oz., 35 cts.; ¼ lb., $1.25; lb., $3.50.

NEW ROSE CELERY. The finest of its class. The color is a beautiful shade of rose, of fine flavor, solid, crisp and entirely free from stringiness. A splendid variety for late use. Per pkt., 5 cts.; oz., 25 cts.; ¼ lb., 75 cts.; lb., $2.50.

French, Celérier-rouge.—German, Knob Selery.—Spanish, Apio raat de Nabo.

A variety of celery with turnip-shaped roots which are white-fleshed, comparatively tender, and have the flavor of celery stalks. The seed may be sown in the open ground in April, and the young plants nursed in the same manner as celery; but in planting out, the ground is mounded and dug, not trenched, and the plants set in shallow drills 12 inches apart, watering being necessary. As the growth advances, draw the earth to the plants, by which means the roots will be blanched, and made tender and very succulent.

The seed may be sown in May or June, in drills half an inch deep, and twelve inches apart; thin out the plants to six inches; cultivate during summer, and the following spring the leaves will be fit to eat. The quality is improved very much by blanching, which can be easily done by covering over the plants with boards.

MUSHROOM SPAWN.

German, Champignon. — French, Champignon. — Spanish, Seta.

Ten pounds will spawn 10 feet square.

The Mushroom is one of the most profitable crops grown, especially in the vicinity of large cities, where the demand, at all seasons, is far in excess of the supply. Its cultivation may be carried on successfully in a cellar or shed during winter, or in the open air in summer.

Cultural Directions: — Collect sufficient fresh horse droppings to form the desired size of bed, spreading them out in an airy shed to dry, and turning them frequently. In a proper state as to dryness, which will soon be learnt by experience, make these into a bed from nine inches to one foot thick, beating them firmly together. If the droppings have been properly prepared, gentle fermentation will soon commence, and when the temperature of the bed is from 75° to 80°, with no danger of it rising higher, put in the spawn. This is done by making shallow holes about nine inches apart, inserting pieces of spawn about the size of a hen’s egg and covering with the dung, pressing this closely about the spawn. It is of the greatest importance that the temperature of the bed should not decline below 75°, nor rise above 80° for a month after spawning. Within this fortnight after putting in the spawn, cover the bed about two inches thick with good, mellow, moist soil, making this firm; and if under this a covering one or two inches thick of cow dung, in the same state as to moisture as the soil, can be afforded, this will cause the bed to last longer, and also to produce a larger crop than if covered with soil only. The most suitable temperature for beds in bearing is 55° to 65°; and as a high temperature causes the mushrooms to come small, this should be avoided. Watering beds in bearing often causes the small mushrooms to damp off; therefore, water only when the bed ceases to be productive, and then use the water about the same temperature as the bed.

TOMATO.

German, Liebesapfel.—French, Tomate—Spanish, Tomates.

An ounce will produce 1,500 plants.

This delicious vegetable is one of the most important of all garden products. The seed should be sown in a heated about the first week in March, in drills five inches apart, and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hot-bed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set out in the open ground. Sufficient plants for a small garden may be started by sowing a few seeds in a shallow box or flower-pot, and placing it in a sunny window of the room or kitchen.

Best of all Forcing. We especially recommend this tomato as one of the finest of recent introductions. It sets freely, fruiting low down and along the stem, dwarf habit, and very prolific. SPECIAL MIXTURE OF GRASSES AND CLOVERS FOR Hay and Permanent Pasture.

The selections of seeds in our mixture, being entirely composed of the true permanent species, are somewhat more expensive than mixtures of seeds which contain a considerable proportion of Ryegrass and Timothy, but it is admitted that the laying down of land to grass with such mixtures as it was customary to use a few years ago has often proved very unsatisfactory, and even when most successful the success has only been attained by the application of expensive manures and after years of waiting; whereas selections of such seeds as are given in this mixture will produce profitable pastures the first year after they have been laid down, and will in general increase in profitable rate year by year if ordinary care be given them.

This special mixture may be sown either in the spring or fall, using three bushels of seed to one acre, with an additional ten pounds of mixed clover, sown in the spring.

Special mixture, per bush. (14 lbs.), $2.50.

Mixed clover, per lb., 20 cts.

Magnificent Plants for Bedding.

It is only recently that it has been known what splendid bedding plants the Tuberous-rooted Begonias make, and how beautifully they flower in the open garden when the hot summer sun. The bulbs can be taken up after frost and kept over winter in a dry, warm place. The beautiful foliage consists of shapely, glistening leaves, gracefully disposed, the plants forming dense oval pyramids crowned with unsurpassed sprays of the most brilliant flowers, some small and others of such immense size as to measure from four to six inches across a single flower. Our mixed seeds are all from varieties with splendid flowers, of fine form and substance, of dwarf growth, well adapted for bedding. (See next page.)

SWEET PEAS.
Lathyrus Odoratus.

The Cream of Eckford's Best Sorts.

CULTURE OF SWEET PEAS.

Sweet Peas should be sown in drills, as early as possible in spring, in rich, friable soil. Prepare the bed by thoroughly working in a large quantity of well-rotted manure. Make a trench six inches deep. In this sow the seed or cover two inches deep. As soon as the plants begin to show through, fill in the trench. This will secure a deep planting without the bad effect of deep covering of the seed at first, and so enable the plant to bloom continuously through the heat of summer. As fast as the flowers come into full bloom, they should be cut off, for if the pods are allowed to form, the plants will stop blooming.

**DEWBERRIES.**

The Dewberry has thus far not been cultivated to any great extent, on account, perhaps, of the few varieties that are worth growing. This is not the case, however, why people should not enjoy this wholesome fruit, especially as it comes between the raspberries and blackberries. The best mode of culture is to treat it somewhat like the strawberry, and plant it in rows six feet apart with the plants three feet distant in the rows, or setting the plants four feet by four. Keep the soil mellow and clean. Owing to its trailing habit it will be necessary to mulch the ground well, as with the strawberry, to keep the fruit from becoming soiled and gritty.

*Lucretia.* Decidedly the best of all Dewberries. As early as or earlier than Early Harvest Blackberry, and larger than Erle. It is a superb fruit; large and handsome, of a shining jet black, melting, and of a delicious quality. The plant is entirely hardy everywhere, a healthy, strong grower, and exceedingly productive. We can confidently recommend the Lucretia as being a fine acquisition to the family garden, and a delightful introduction to the blackberry season. Strong plants. Per doz., 50 cts.; per 100, $8.00.

GREAT JAPANESE WINEBERRY.

The canes of this interesting plant are large, robust and perfectly hardy; they are thickly covered with purplish-red hairs, which extend along the stem to its extremity. The leaves are large, tough, dark green above and silvery gray beneath. Each berry is at first tightly enveloped by the large calyx, forming a sort of hurr; which is also covered with purplish-red hairs so thickly as to present the appearance of moss rose buds. These gradually open and turn back, exposing the fruit in all its beauty. The berries are of medium size, but of a beautiful, translucent appearance, running through all the shades of amber to crimson as they ripen. In quality it is good, with a rich and spirtly flavor, but decidedly brisk sub-acid. When cooked it is simply grand; surpassing by far when canned the Huckleberry and all other small fruits.

Strong Plants, each, $0.15; per doz., $1.50.

Goldwell's "Improved" HORSE LAWN MOWER.

We believe this to be the best Horse Lawn Mower ever made. It has side draft attachment to enable the horse to walk on the cut grass only, and easier rollers which will not mark the lawn. We secure evenness of cut by an adjustment which raises or lowers the two sides at the same time by means of a simple lever movement; the same lever serves the purpose of raising the knives from the ground when driving over gravel walks or roads. The mowers are fitted up with steel shafting and composition split bushings, same as the hand mowers, and the same care is taken to have the workmanship perfect.

Chain Roller Golf Lawn Mower.

This Mower is made to meet the demand for a machine that will more perfectly cut borders, verges, etc., and yet retain all the other features necessary in a mower for general work. The great advantage of this Mower is the substitution of a bicycle chain for the gears generally used in this style of mower. This reduces the noise and friction to a minimum. The machine with 6 blades is highly recommended by most of the leading golf clubs in America for work on putting-greens.
